

Prepardy

Class Rules

1. Every member of your team must have the chance to answer a question.
2. Each team must have one member to compete in answering a question.
3. On the board, there will be a series of categories with dollar amounts. Each team will alternate to choose the category and the amount.
4. The teacher will use a random method (pick a number, coin toss) to determine which team will be the first to choose the category and the amount.
5. Once a category and an amount have been chosen, the teacher will read the statement.
6. The first student to “buzz in” (raise his/her hand) first will have the first chance to give his/her answer in the form of a question.
7. In order for the team to receive the points assigned to that question, the student must have given the correct answer in the form of a question.
8. If a team member does not answer in the form of a question, or give the correct answer, that team will lose the points assigned to that question. The other team may choose to “buzz in” and attempt to give an answer.
9. Each team will send up a member and continue to compete until all of the questions have been answered.
10. At the end of the first round, each team will add up their points and determine how much they would like to wager on Final Prepardy. The team will write this amount onto a piece of paper and hand it to the host (teacher).
11. The team will be able to listen to the question, confer as a team, and then write their answer (in the form of a question) on a piece of paper. Teams will have one minute after the question has been read to hand their answers to the host.
12. The host will re-read the question, both answers, and award points for the correct responses. The team with the highest number of total points will be declared the winner!
